THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME LI

July to December, 1934

Head Office:
49, Wellington Street, London, W.C.2

XUM

Index to Volume LI

SUBJECT INDEX

A

Aims and Objects of the Institute of British Foundrymen, 149.
Allied Traders and the Institute, 261.
Alloy Cast Irons, Experiences in the Manufacture of High-Grade and, 353, 373.
Alloy Steel Castings, Production of, 102.
Alloys Containing Nickel, Some Light, 411.
Alloys Research Committee, 48
Aluminium Alloy Sand or Die Castings, New Specifications, 191.
Aluminium, Spectrographic Analysis of Some Alloys of, 311.
Analysis of Some Alloys of Aluminium, Spectrographic, 311.
Annealing Malleable Iron, 330.
Avery Testing Machine, New, 344.

B

Bells and Cannon, 357.
Box Parts in Quantity Production, Rôle of, 89.
British Cast Iron Research Association, Annual Meeting and Luncheon, 293.
British Iron and Steel Federation, Appointment of Independent Chairman, 322.
British Ironfounders' Association, Annual Dinner, 379.
British Standards Institute, Annual Meeting, 56.
Bronze and Brass, Manganese, 369.

C

Camber on Long Single Casting, 177.
Carbon Control for Cupola Melting, 55.
Cast Bronzes, Studies in (Discussion), 5.
Cast Iron and its Influence upon the Properties of the Cast Metal, Contribution to the Study of Graphite Formation and Structure in, 7, 41.
Cast Iron, Elasticity, Deflection and Resilience of, 76.
Cast Iron, Engineering Properties of, 385.
Cast Iron in the Manufacture of Textile Machinery, Use of High-Duty, 3.
Cast Iron, Permanent Set and Elastic Hysteresis in, 405.
Cast-Iron Practice, Electric, 145.
Cast Iron, Relationship between Sulphur and Silicon Contents of, 184.
Cast Iron, Resistance to High Temperatures, 184.
Cast Iron, Round Tensile Bars for, 100.
Cast Iron Sub-Committee of the Technical Committee, A Report of the Work of the, 27, 43.
Cast Iron Sub-Committee Report (Reply to Discussion), 178.
Cast Iron, The Determination of Sulphur in, 308.
Cast Iron to the Designing Engineer, The Meaning of the Transverse Test of, 129.
Cast Irons, Experiences in the Manufacture of High-Grade and Alloy, 353, 373.
Cast Red Brass for the Establishment of a Basic Classification of Non-Ferrous Ingot Metal for Specification Purposes, Studies on, 5, 411.
Casting Process for Shoe Lasts, A New Slush, 304.
Castings for Laundry Machinery, 357.
Ceralumin "C," new light alloy, 59.
Coke Research, 61.
Copper Takes a Jump, 286.
Core Prints, 93.
Core Stove, New Type of, 213.

Correspondence :—
Cast Iron Sub-Committee Report, 210.
Chromium in Malleable Iron, 128, 336, 368.
"Fettling" the Cupola, 2.
Foundry Costing, 336, 352, 384.
Machine Tool Castings, 304.
Mechanisation, 70.
Mechanisation: Hand Production and Output, 228, 234, 270.
Names and Numbers, 218.
Permanent Mould Process, 352.
Phosphorus and Porosity, 2, 36.
Routine Analysis of High Sulphur in Steels, 174.
The 1⅛-in. Dia. Test-Bar, 204.
The Foundry of Ford Motor Company, 250.
The Oldest Grey-Iron Casting, 384.
Tin Oxide Substitutes, 228.
What is Belgian Sand? 384.

Cores, Mechanical Production of, 71.
Costing for Vitreous Enamelling, 401.
Costs, Foundry, 135.
Costs in a Grey-Iron Foundry, Suggested Method of Establishing Melting, 290.
Cupola Melting, Carbon Control for, 55.

D

Density and Soundness of Ferrous and Non-Ferrous Castings, Some Factors Influencing the, 87, 117.
Designer and Patternmaker in Relation to Foundry Practice, The Position of, 319, 404.
Determination of Sulphur in Cast Iron, 308.

District Presidents :—
Beech, A. S., 114.
Cook, Dr. Maurice, 318.
Cook, W. Norman, 174.
Gray, Kenneth, 352.
Hackwood, J., 144.
Harris, F., 368.
Hinton, F. W. C., 270.
Hurst, H., 286.
Lunt, G. T., 190.
Mather, T., 250.
Peace, A. E., 336.
Robson, F., 218.
Smithells, Dr. C. J., 302.
Wallace, William, 158.

Dust Separation, Efficient, 194.

E

Elastic Hysteresis in Cast Iron, Permanent Set and, 405.
Elasticity, Deflection and Resilience of Cast Iron, 76.
Electric Cast-Iron Practice, 145.
Electricar "Stowaway" Crane Truck, 116.
Elucidating Foundry Problems, 361.
Embrittlement of Low-Carbon Steel, 224.
Enabling Bill for Promoting Industrial Reorganisation, 358.
Endurance Strength of Cast and Welded Structural Parts, 95.
Engineering Properties of Cast Iron, 385.
Experimental Researches Relating to Specifications of Welding Rods for Cast Iron with Particular Significance to Preheating, 104.

F

Facing the Fall, 70.
Facings, Foundry, 134.
Ferrous and Non-Ferrous Castings, Some Factors Influencing the Density and Soundness of, 87, 117.
Ferrous Metallurgy, Future Problems in, 175.
Ferrous Metals at A.S.T.M. Annual Meeting, 88.
"Fluidrive," a New Fluid Coupling, 20.
Ford Motor Company at Dagenham, The Foundry of, 235, 255, 277.
Foundry Conditions on Tyneside, 227.
Foundry Education in Scotland, 280.
Foundry Methods from an Engineer's Point of View, 341.
Foundry Selling Practice, 40, 115.
Foundry Supplies and Research Efforts, 263.
Foundry Training, 329.
Furnace Design, Developments in German High-Frequency, 179.

G

General Refractories Coming-of-Age Celebrations, 346.
German Foundrymen's Association, Annual Meeting, 46.
German High-Frequency Furnace Design, Developments in, 179.
Glass Enamels, Development of, 411.
Graphite Formation and Structure in Cast Iron and its Influence upon the Properties of Cast Metal, Contribution to the Study of, 7, 41.
Grey Cast Iron, Effect of Slags upon, 90.
Grey-Iron Foundry, Suggested Method of Establishing Melting Costs in a, 290.

H

Hall & Pickles, Limited, Ecclesfield Works of, 167.
Hardness, Strength and Deflection of Cast-Iron Rolls, 180.
Heat-Resisting Alloys, 184.
Heat-Treatment of Cast Iron, 180.
High-Duty Cast Iron in the Manufacture of Textile Machinery, 3.
High-Grade and Alloy Cast Irons, Experiences in the Manufacture of, 353, 373.
History of the Development of Ironfounding in the Sheffield District, A Note on the, 219, 241, 303

I

Indian Foundry Production, 387.
Industrial Drives and Running Costs, 310.
Industrial Laboratory Expansion, 54.
Industrial Lighting, New Phase in, 90.

670.5
V 51

Institute of British Foundrymen :—
Birmingham, Coventry and West Midlands Branch, Presidential Address, 261.
East Midlands Branch, Presidential Address, 263.
East Midlands Branch, Visit to Messrs. Bamfords, Limited, 260.
Election of New Members, 190.
Institute of British Foundrymen, Aims and Objects, 149.
Lancashire Branch, Presidential Address, 271, 361.
List of Members who attended the Annual Conference at Manchester, 14.
London and East Midlands Branches, Joint Meeting in London, 336.
London Branch, Presidential Address, 161.
Newcastle-upon-Tyne Branch, Presidential Address, 227.
Scottish Branch, Presidential Address, 280.
West Yorkshire Branch, Presidential Address, 329, 379.
Institute of Metals, Autumn Meeting in Manchester, 163.
Institute of Metals, Programme of Autumn Meeting, 32.
Institute of Vitreous Enamellers, The, First Annual Conference at Birmingham, 205.
Institute of Vitreous Enamellers, The, List of Members, 223.
Institute of Vitreous Enamellers, The, Second Day of the Annual Conference, 221.
International Foundry Congress at Philadelphia, 92, 107, 254, 287, 302, 326.
International Relationships and the British Foundry Industry, 161.
Iron-Aluminium Alloys, Physical Properties of, 181.
Iron and Steel Institute, Autumn Meeting Programme, 94, 106.

L

Lead, Queuing up for, 168.
Leaders :—
A Debt Repaid, 233.
A Heritage of Errors, 301.
A New Complexion, 35.
Alloys of Iron Research, 203.
An Unqualified Success, 203.
Back to the Starting Post, 143.
Bearing Metals, 143.
British Cast Iron Research Association, 269.
British Industries House, 19.
Chemical Analysis, 249.
Conditions in Germany, 113.
Contact Work, 317.
Co-operation and Costs, 367.
Development Work by the User, 399
Early Castings, 249.
Education for Commerce, 383.
Expert Witnesses—I, 217.
Expert Witnesses—II, 233.
Foundry Costing, 113.
Future of the Craftsman, 269.
Industrial Reorganisation, 335.
International Business, 189.
Ironbridge, 157.
Keeping Secrets, 127.
Machine Tools and Castings, 285.
Manual Skill and Intelligence—I, 173.
Manual Skill and Intelligence—II, 189.
Mechanisation, 53.
Mental Pictures, 157.
Metallurgical Rivalries, 99.
Paying for the Best, 367.
Permanent-way Castings, 35.
Physical Chemistry and Foundry Practice, 351.
Reliability of the Railways, 399.
Satisfaction Clause in Contracts of Sale, 1.
Science in the Press, 351.
Silicosis and Sand-Blasting, 85.
Skin, 127.
Some Laboratory Inspections, 1.
S.O.S., 69.
Standard Symbols, 301.
Suggested Method for Establishing Melting Costs in a Grey-Iron Foundry, 318.
The Adventure of Learning, 173.
The Foundry and the Traffic Problem, 85.
The Limits of Technical Education, 285.
The Mersey Tunnel, 53.
The New Deal—I, 317.
The New Deal—II, 335.
The Solid State, 217.
Theory and Practice, 383.
Trade Prospects, 99.
Welding and the Foundry, 69.
Life of Grate Castings, 372.
Lighting, Industrial, 124.
Lighting in Sheffield Foundries and Steelworks, Industrial, 358.
Low-Pressure Oil-Burner Design, 392.
Luxemburg Iron Industry, 195.

M

Manganese Bronze and Brass, 369.
Machine-Tool Casting, An Intricate, 3.
Malleable Iron, Annealing, 330.
Manganese, Silicon and Carbon in Steel Manufacture, Behaviour of, 138.
Masks, Industrial Gas and Dust, 318.
Mass Effect and Quality in Steelmaking, 47.
Mechanical Production of Cores, 71.
Mechanisation, Practical Points in Foundry, 277.
Mechanised American Railway Brass Foundry, A Completely, 165.
Mersey Tunnel, 58.
Modern Pulverising, 107.
Modern Trends in Foundry Practice, 271.
Molybdenum in Cast Iron and Steel, Estimation of, 124.
Moulding a Centrifugal Pump Casing by Strickling, 198.

N

National Physical Laboratory, 60.
Nickel Position, 400.
Nickel, Some Light Alloys Containing, 411.
Nitrogen Hardening, Ni-Cr-Mo Steel, 56.
Non-Ferrous Ingot Metals for Specification Purposes, Studies on Cast Red Brass for the Establishment of a Basic Classification of (Discussion), 5, 411.
Non-Ferrous Metals at A.S.T.M. Annual Meeting, 86.
Non-Ferrous Practice, 337.
Non-Ferrous Scrap Position, 197.
Non-Ferrous Scrap Position, Better, 39.

O

Oil-Burner Design, Low-Pressure, 392.
" One-Pipe " System of Drainage in Buildings, 162.
Oven Drying of Cores and Moulds, 21, 57.
Oven Drying of Cores and Moulds (Author's reply to discussion), 159.
Oxide in Molten Steel, Rapid Determination of, 412.

P

Patternmaker in Relation to Foundry Practice, The Position of Designer and, 319, 404.
Patternmakers, Time-Saving Tables for, 152.
Permanent Set and Elastic Hysteresis in Cast Iron, 405.
Physical Properties of Iron-Aluminium Alloys, 181.
Porosity Chills and Denseners, 244.
Production of Alloy Steel Castings, 102.
Propulsion of the " Queen Mary," 194.
Pump Casing by Strickling, Moulding a Centrifugal, 198

R

Refractories at High Temperatures, Permeability of 312.
Research Department of the United Steel Companies, Limited, Central, 37.
Resistance of Cast Iron to High Temperatures, 184.
Roll Foundry at Gateshead, 133.
Rosenhain, Walter, the Work of, 153.
Round Tensile Bars for Cast Iron, 100.
Routine Analysis of High-Sulphur Steels, 80.

S

Sand Control, Practical, 359.
Sand Practice, Modern Foundry, 378.
Sand Practice, Recent Developments in British Synthetic Moulding (Discussion), 24.
Sands, and the Control of Supplies by Specification, The Testing of Steel Foundry, 305, 323, 359.
Scrap Metal Difficulties, 394.
Sheffield University Degree Course in Foundry Practice, 60.
Sheffield University Degree Course, Prospectus, 211.
Shot-Blast Machine, A Novel Continuous, 340.
Silicosis and Sand-Blasting, 91.
Skin, Casting, 362.
Slags upon Grey Cast Iron, Effect of, 90.
Slush Casting Process for Shoe Lasts, A New, 304.
Small Turbine Units, 59.
Soft Cast Iron, 137.
Specification, The Testing of Steel Foundry Sands, and the Control of Supplies by, 305, 323, 359.
Spectrographic Analysis of Some Alloys of Aluminium, 311.
Spelter, Setback in, 32.
Spelter, Unhealthy Situation, 227.
Staveley Coal & Iron Company, Limited, The Pipe Foundries of, 225.
Steel Castings, 251, 273.
Steel Castings with Special Reference to the Tropenas Process (Discussion), 31.
Steel Foundry Sands, and the Control of Supplies by Specification, The Testing of, 305, 323, 359.
Steel, Rapid Determination of Oxide in Molten, 412.
Steelmaking, Mass Effect and Quality, 47.
Strickling, Moulding a Centrifugal Pump Casing by, 198.
Structural Parts, Endurance Strength of Cast and Welded, 95.
Suggested Method of Establishing Melting Costs in a Grey-Iron Foundry, 290.
Sulphur in Cast Iron, The Determination of, 308.
Synthetic Moulding Sand Practice, Recent Developments in British (Discussion), 24.

T

Technical Committee, A Report of the Work of the Cast Iron Sub-Committee of the, 27, 43.
Tensile Strength of Steel at Low Temperatures, 148.
Test-Bars from the Foundryman's Point of View, 73.
Test-Bars, Report of Special A.S.T.M. Sub-Committee on, 114.
Textile Machinery, On the Use of High-Duty Cast Iron in the Manufacture of, 3.
Thickness of Steel Plates and Castings, A Method of Determining the, 65.
Tin, Nervousness in, 114.
Transverse Test of Cast Iron to the Designing Engineer, The Meaning of the, 129.
Tropenas Process, Steel Castings with Special Reference to the (Discussion), 31.

U

Unemployment Insurance Scheme—1934 Act, 160.

V

Vitreous Enamelling, Costing for, 401.
Vitreous Enamelling, Factors in the Economic Conduct of, 407.
Vitreous Enamelling of Cast Iron, 375.
Vitreous Enamelling on Cast Iron and Sheet Steel, 207.

W

Welding of Iron and Steel, Forthcoming Symposium on the, 404.
Welding Rods for Cast Iron with Particular Significance to Preheating, Experimental Researches relating to Specification of, 103.
Who's Who in Vitreous Enamelling, No. 1—Dr. J. W. Mellor, F.R.S., 20.
Who's Who in Vitreous Enamelling, No. 2—Mr. W. H. Whittle, 54.
Who's Who in Vitreous Enamelling, No. 3.—Miss Christine Elliot, 70.
Who's Who in Vitreous Enamelling, No. 4—Mr. J. H. Coupe, 144.
